“Analyze project change and its impacts...”

Why we are here...

✂ Why we are here

✂ What we studied

- Project Changes
 - » Why?
 - » Why?
 - » Why?

Root Causes

- **We don't identify the public need well enough (or often enough)**
- **We don't identify and manage process well enough**

The “General” Solution

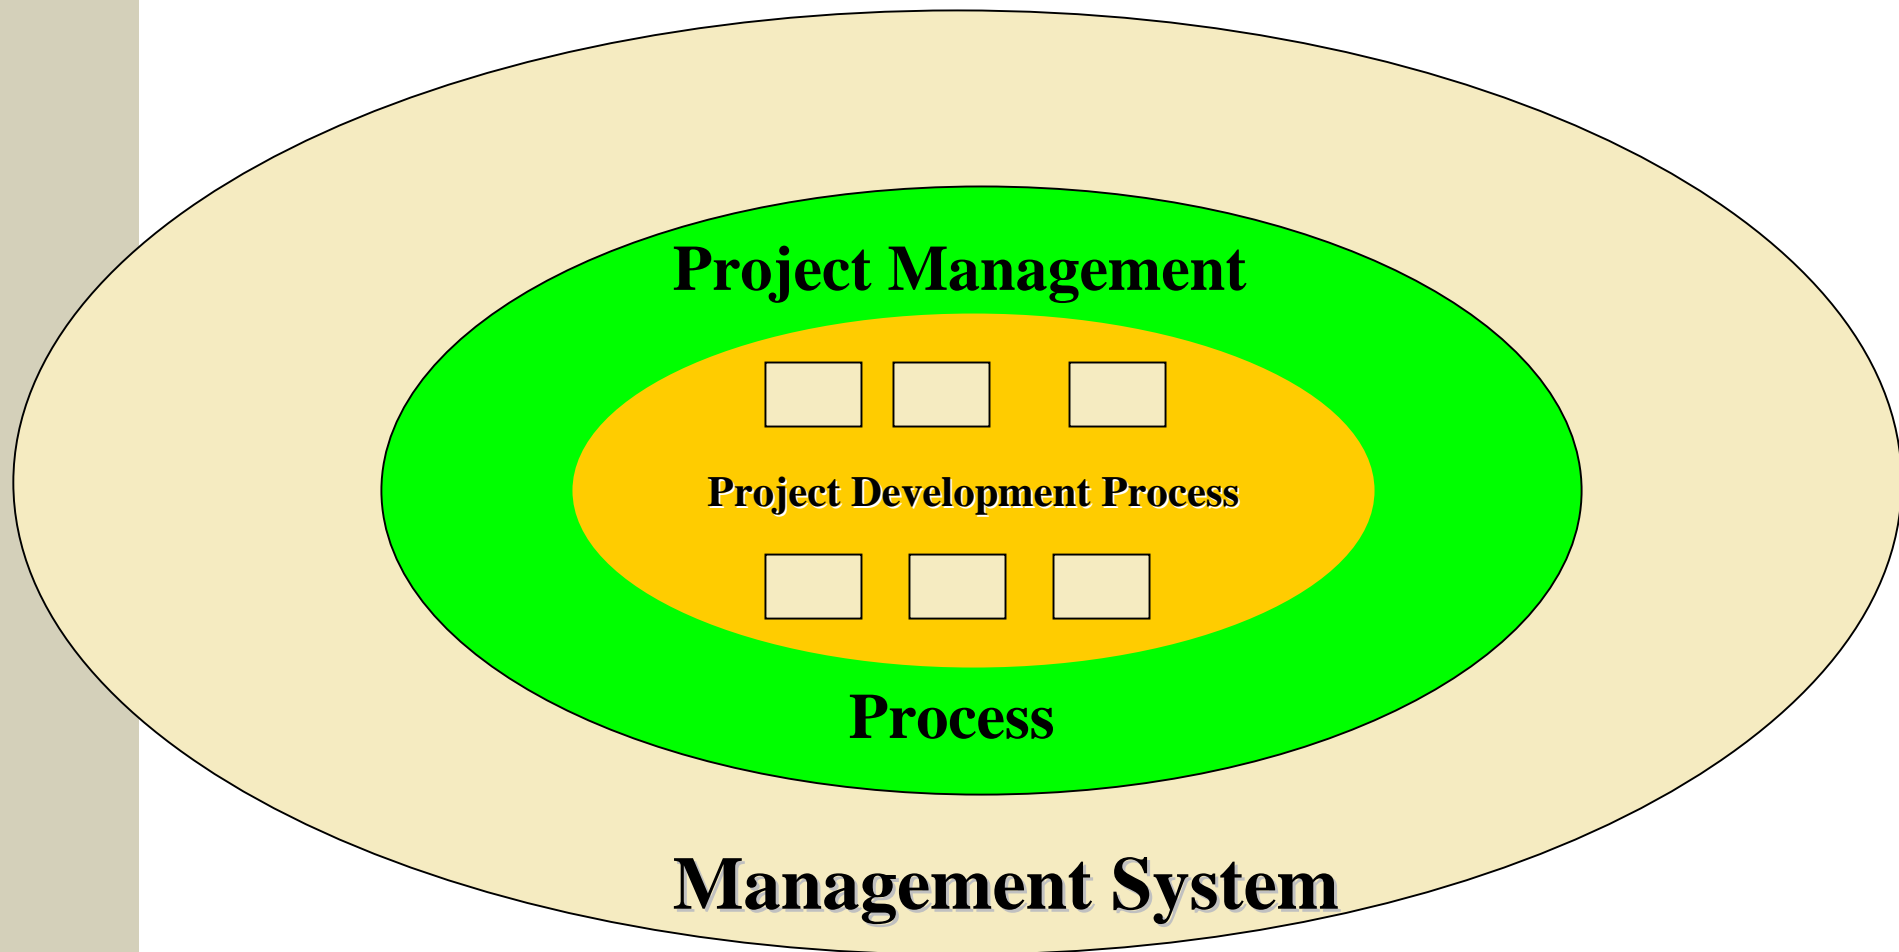

“We need to measure and monitor process to ensure:”

- The public need is identified
- We have clearly identified objectives
 - » Ensure that project objectives are met
- Identification and management of project risks
- A communication process is followed

We need...

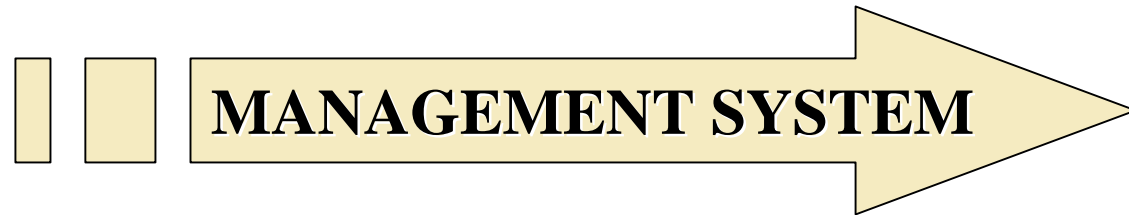

✚ A clearly stated *Management System* to support to support program and project development

Management System

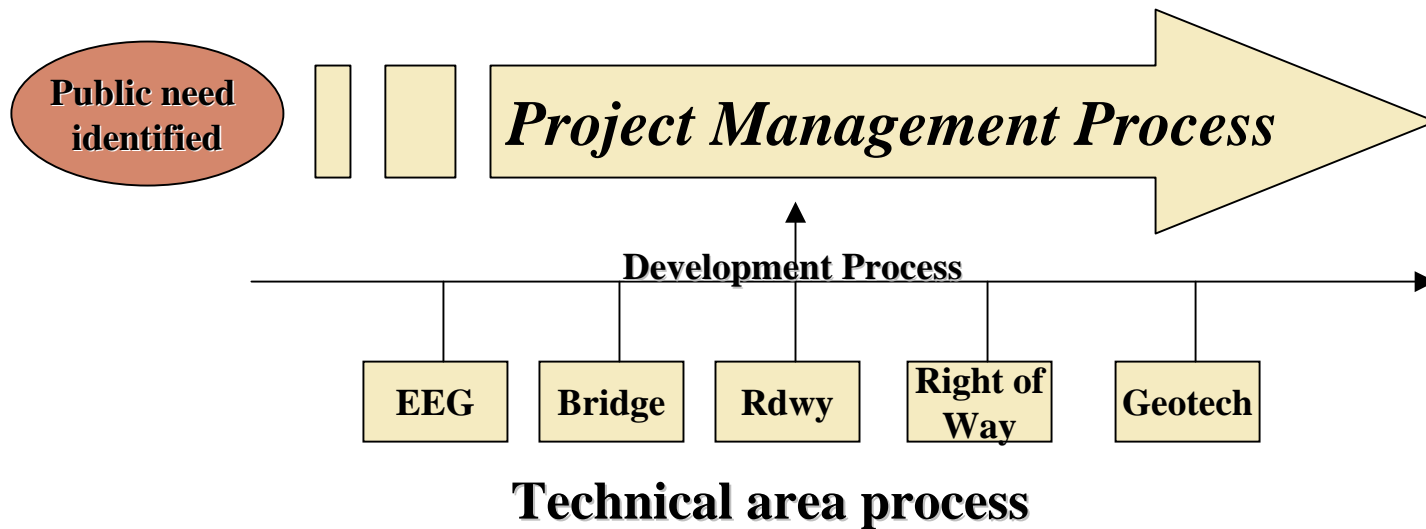

The solution

The "medicine"

The management system supports Program and Project development

Where we are going...

- ✖ We are developing a project charter
- ✖ Defining the objective and the elements of the management system
- ✖ Will present requirements for an implementation team...

Questions...?

Thank you!
